## DETAILED ACTION

### *Election/Restrictions*

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

**Applicant is required to elect for each of (i) and (ii):**

(i) a single disclosed cyclohexylamine or aminoadamantaine derivative of formula

(I) active compound specie; elect a single compound from memantine or a pharmaceutically acceptable salt of memantine (claims 8, 42); neramexane or a pharmaceutically acceptable salt of neramexane (claim 12) or species disclosed in the specification (paragraphs 0018-0019, 0022, 0023), or the identification of the backbone structure and all substituents of formula (I) to identify a single compound; and

(ii) a single disclosed composition; specify each component present in the composition: elect from any one of claims 42-55; or specify each component of an alternate composition disclosed in the specification, such as a single composition from Tables 11, 15, or 19.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

- (i) claims 8-55 correspond to active species
- (ii) each of claims 42-55 corresponds to a composition specie

The following claim(s) are generic: claims 1-7 are generic for (i); claims 1-41 are generic for (ii).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons:

The technical feature linking the species is a aqueous based composition containing a compound of formula (I). Lipton, et al. (WO 02/045710 A1; IDS 12/3/2007 reference) teaches NDMA receptor antagonists, including memantine (p. 17, line 12) formulated into aqueous suspensions (p. 21, line 18). Since Lipton previously disclosed the technical feature, the technical feature lacks novelty.

Therefore, the technical feature linking the species does not constitute a special technical feature as defined by PCT Rule 13.2 as it does not define a contribution over the prior art. Accordingly the species are not so linked by the same or a corresponding special technical feature as to form a single inventive concept.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy P. Thomas whose telephone number is (571) 272-8994. The examiner can normally be reached on Monday-Thursday 6:30 a.m. - 5:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Ardin Marschel can be reached on (571) 272-0718. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
